# AMT Software Landscape Overview: Asset Management System (current)

## 3rd Party Services & Platforms

/asset command recalls the name of the asset and last status entry

/asset command + asset number+ Text enters a status record for that asset.

Hosted on WPEngine with Dev and Staging instances and nightly backups

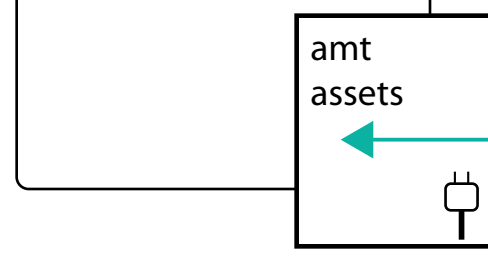

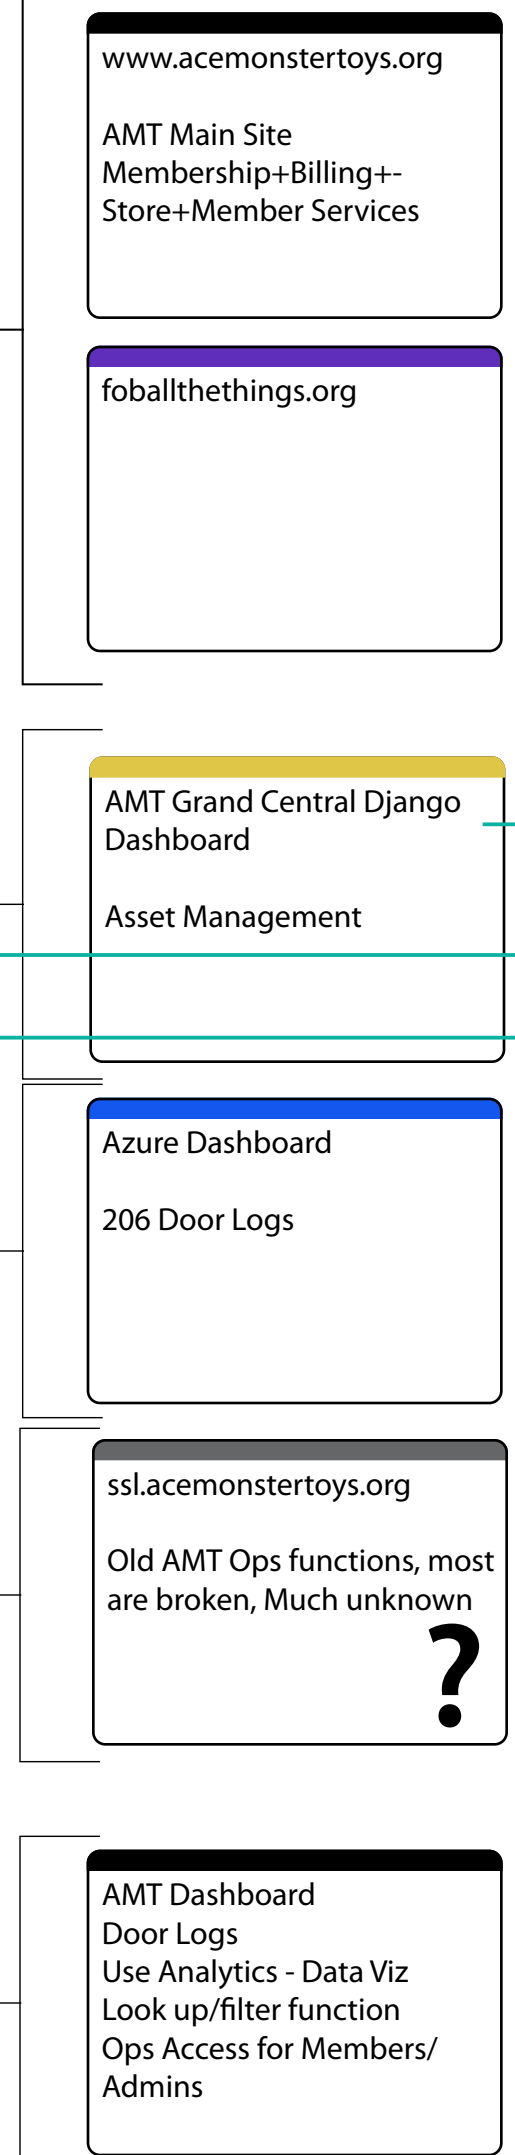

Hosted on Digital Ocean

Azure

Prgmr.com

TBD

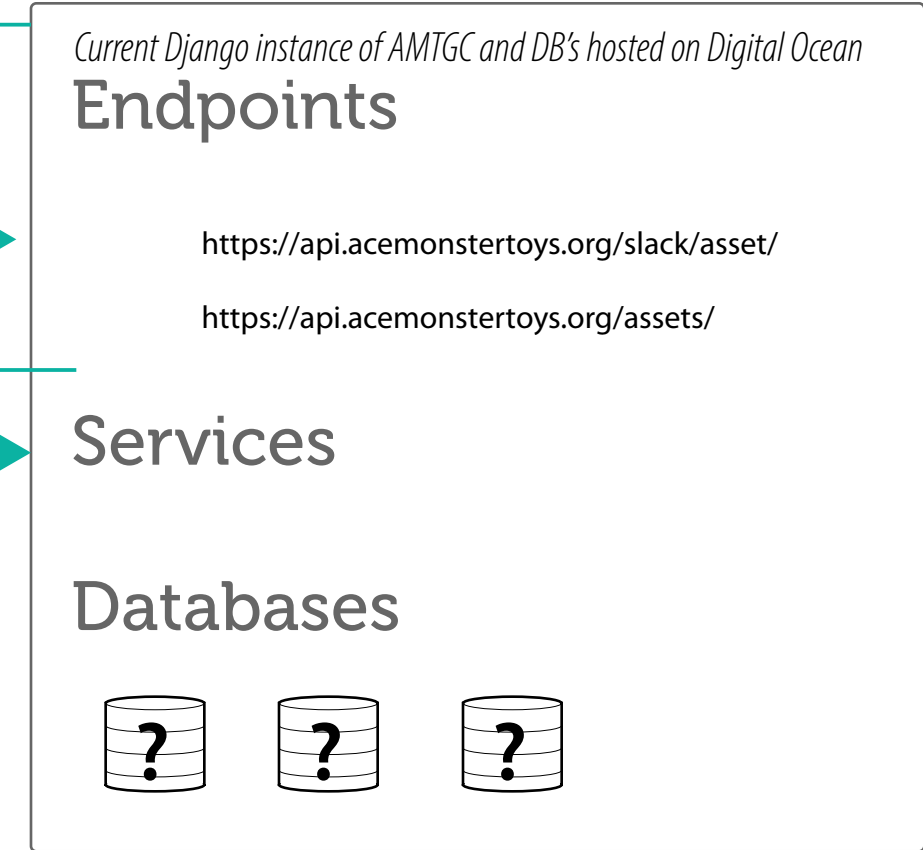

## Websites & Admin Dashboards

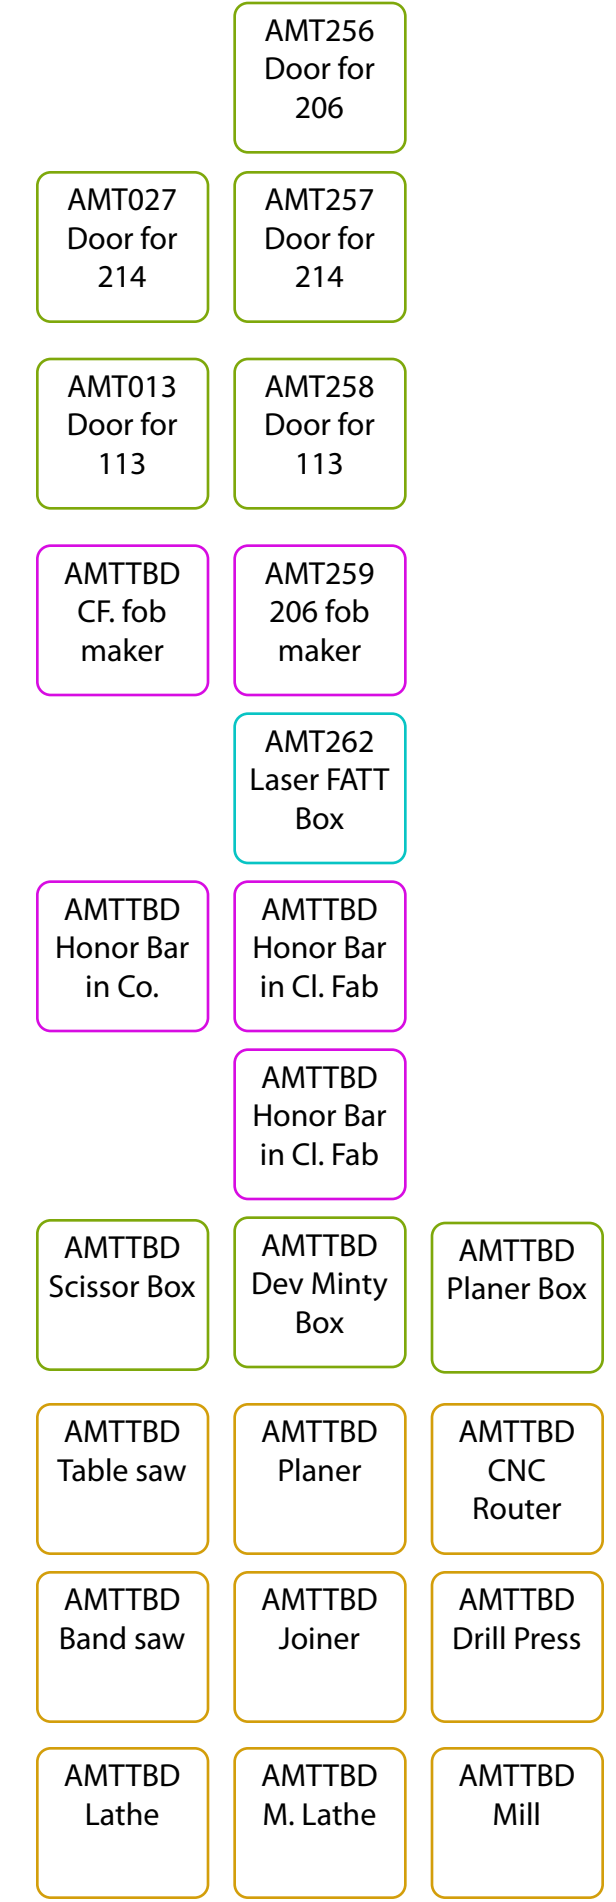

Pulls main record + Latest status with shortcode by Asset number.

Data entry for main asset records. User accounts for specific group.
